Remarks and Arguments

Claims 8 - 26 are pending.

Claims 8, 9, 14, 15, 19, 20, 22, and 23 have been amended to more clearly and distinctly recite the subject matter that applicants regard as their invention, and to distinguish the present invention over the cited prior art references. In particular, the claims are amended to include the recitation that the first and second communications channels are associated with independent first and second transponders of a single data delivery system. Support for the amendment is shown throughout the specification, for example, Figures 5-7, and description on paragraph 0027.

Applicants submit that the amended claims are patentable over the cited references since they add additional limitations to claims already deemed to be allowable. For similar reason, Applicants submit that further search and/or examination is not required. Therefore, Applicants respectfully request entry of the present amendment.

It is believed that there are no additional fees due with regard to the filing of this response. However if there is an additional fee due, please charge the fee, or credit any overpayment, to Deposit Account No. 07-0832.

Respectfully submitted,

By:
